## **MiniFAB a finalist in the Plastics Industry Achievement Awards 2012**

**Melbourne, Australia -- 20 SEPTEMBER 2012 --** [MiniFAB](http://www.minifab.com.au) (AUST) Pty Ltd was selected as a finalist in the Plastics Industry Export award category at the Plastics Industry Achievement Awards 2012. The awards ceremony coordinated by [PlastixANZ](http://www.plastixanz.com.au) was held September 12 in Melbourne.

MiniFAB specializes in developing custom microfluidic solutions with a focus on solving complex problems in lab-on-chip and point-of-care diagnostics. MiniFAB has a strong design for manufacture approach, enabling rapid scale-up to volume manufacturing of polymer microfluidic systems. The majority of MiniFAB's development and manufacturing clients are international.

"We were honoured to be a finalist in this category. MiniFAB exports custom microfluidic cartridges to clients in the US and Europe." says Andrew Campitelli, MiniFAB's Head of Marketing and Business Development.

### **About MiniFAB**

MiniFAB is an ISO 13485 certified, privately-held contract engineering firm providing custom development and manufacture of disposable polymer microengineered products. Established in 2002, MiniFAB has completed over 500 projects with partners worldwide. With a flexible and open engagement model, MiniFAB's product development process covers the entire spectrum, from converting early-stage product concepts into prototypes through to full-scale, high throughput OEM manufacturing. With a focus on lab-on-chip solutions for point-of-care, laboratory, and in-field applications, MiniFAB has delivered custom solutions into diverse markets including medical devices, diagnostics, food packaging and aerospace. For more information, visit [www.minifab.com.au](http://www.minifab.com.au).
